

LUIZA LENCINA

SOFTWARE ENGINEER

PERSONAL PROFILE

I'm a dedicated and curious software developer who genuinely enjoys building products that solve real problems. I work mainly with front-end development, but I'm comfortable navigating the full stack when needed. What motivates me most is turning complex requirements into clean, functional, and intuitive solutions.

Throughout my career, I've worked with technologies like React, JavaScript, HTML, and CSS, building interfaces, integrating APIs, and improving application flows. I care a lot about code quality, maintainability, and user experience, and I'm always looking for ways to improve both the product and the development process.

I learn fast, take ownership of what I do, and value teamwork and clear communication. I believe the best results come from collaboration, organization, and a shared sense of responsibility.

I'm constantly evolving as a professional and looking for opportunities where I can grow, contribute meaningfully, and create impact alongside the people I work with.

ADDRESS

- Rua nunes machado, 444 -
Azenha | Porto Alegre - Brazil

EDUCATIONAL HISTORY

English Course

TopWay School | 2026 – current

Bachelor of Software Engineering

PUCRS - BRAZIL | 2019 – 2025

SKILLS AND EXPERTISE

- **Frontend:** Angular, React, Vue.js, JavaScript, TypeScript, HTML, CSS, SCSS, SASS, Bootstrap, PO UI
- **Backend:** Node.js, C#, Java, SQL, NoSQL, MongoDB, JSON, REST APIs
- **Mobile:** Flutter, Dart
- **Design:** UI/UX Design, Figma, Adobe Creative Suite
- **DevOps & Tools:** Docker, Azure DevOps, GitHub, Jira, Karma, Jasmine
- **Other Technologies:** Unity, Virtual Reality (VR), SteamVR, 3D Modeling

WORK EXPERIENCE

Interop

Developer Senior | 2025 - Current

- Owned and led the development of a core product, responsible for its evolution, maintenance, and stability, while planning tasks, implementing full-stack features, mentoring junior developers, and collaborating directly with clients to deliver high-quality solutions.
- Technologies:** React, TypeScript, Node.js, C#, MongoDB, SQL, NoSQL, Docker, Azure DevOps, JSON, GitHub, Karma, Jasmine

Totvs

Fullstack developer Pleno | 2021 - 2024

- Worked on two large-scale enterprise applications, developing new features, maintaining system stability, implementing improvements to reduce recurring issues, and contributing to generic APIs that supported internal legal teams.
- Technologies:** React, Angular, Node.js, C#, MongoDB, SQL, NoSQL, Docker, Azure DevOps, PO UI, JSON, GitHub, Karma, Jasmine

Noc Technolgy

Fullstack developer and UI/Ux Designer
2019 - 2020

- Responsible for designing and developing all product screens for mobile and desktop applications, maintaining existing features, fixing bugs, and implementing new functionalities based on business requirements for a platform connecting photographers and restaurants to support small businesses.
- Technologies:** React, Angular, JavaScript, HTML, SASS/SCSS, Bootstrap, MongoDB, SQL

Nelogica

Fullstack developer Pleno | 2024 - 2025

- Led the development and maintenance of a core product, managing the full lifecycle from planning to delivery, organizing tasks in Jira, developing new features, mentoring junior developers, and collaborating directly with clients to deliver effective solutions.
- Technologies:** React, Vue.js, Angular, TypeScript, Node.js, C#, MongoDB, SQL, NoSQL, Docker, Azure DevOps, JSON, GitHub, Karma, Jasmine

Software Innovation Laboratory (LIS)

Intern | 2020 - 2021

- Contributed to the development of Virtual Reality (VR) applications using Unity and SteamVR, creating interactive environments, 3D objects, and user interfaces for immersive experiences.
- Technologies:** Unity, C#, SteamVR, Virtual Reality, 3D Modeling, HTML, CSS
